# Andrew Grabarnick CV

📍 Limassol, Cyprus | ✉️ agrabarnick@gmail.com | 🔗 LinkedIn

## Product Leader at the forefront of AI innovation.

I build enterprise-grade developer and business tools. For over 10 years, our products have powered automation for major companies across Europe, Russia, and the CIS.

### Founder & Lead Engineer

**Stractik AI,** 2026 - Present, Limassol, Cyprus

A multi-agent autonomous system designed to transform unstructured institutional knowledge into actionable business decisions using a graph-based RAG architecture.

- **Product Vision & Execution:** Engineered a 0-to-1 solution to automate complex, non-linear business workflows that traditional LLM applications fail to handle due to context limitations.
- **Agentic Business Automation:** Orchestrated a fleet of autonomous agents (Mastra, Composio) capable of executing tasks across 100+ enterprise tools (GitHub, Slack, Calendar), bridging the gap between AI analysis and real-world action.
- **Graph-Enhanced Intelligence:** Implemented a Neo4j knowledge graph to manage complex relationships between goals and tasks, enabling the AI to maintain deep situational awareness and provide high-confidence recommendations.
- **Scalable Architecture:** Built a production-ready stack (TypeScript, Node.js, React, Docker) with a focus on modularity and rapid deployment, ensuring the system can scale from personal productivity to team-wide automation.

**Business Impact:** Successfully demonstrated how combining agentic orchestration with graph data structures reduces operational overhead and enables autonomous execution in complex enterprise environments.

# Head of AI Products Department, CPO

**Just AI / Tovie AI,** 2024 - Present, Limassol, Cyprus

Responsible for the core AI products business unit at Just AI (100+ people including product, engineering, marketing, sales, and implementation).

Managing a portfolio of 6+ developer platforms and AI tools used by enterprises and mid-sized companies in banking, telecom, retail, HR, and SMB across Russia, CIS, and Europe.

Achievements:

- 📈 Scaled revenue to $10M annually with 30% YoY growth.
- 🚀 Launched multiple AI-powered developer products (JAICP, Agents Platform, Aimychat, Caila).
- 🤝 Worked with top-tier enterprise clients (banks, telcos, major retailers) and expanded into SMB segment.

## AI Focus

Building AI-powered developer tools that allow engineers to create business automation solutions:

- LLM-first development approach for conversational AI and automation.
- RAG implementation for enterprise knowledge management.
- Multi-model deployments with OpenAI, Anthropic, LLama, Qwen.
- Voice AI assistants for customer support, HR automation, and enterprise process management.

AI Achievements:

- Delivered enterprise-grade voice assistants in banking and telecom.
- Built AI-driven HR automation platforms.

- Designed frameworks for enterprise AI agents, deployed across multiple industries.

## Leadership & Management

- Direct leadership of a 100+ people team across product, engineering, and marketing.
- Built and restructured product teams, implemented JTBD framework and story scoring.
- Close collaboration with sales and implementation teams to align roadmap with client needs.
- Hands-on experience in conflict resolution, process optimization, and scaling organizations.
- Introduced competitive analysis framework and sales forecasting system.

## Business Impact

- 📊 Grew annual revenue to $10M, with consistent 30% YoY growth.
- 🏦 Clients: top banks, telecom operators, major retailers, and SMBs across Russia, CIS, and Europe.
- 💼 Delivered solutions for customer service automation, HR processes, and enterprise knowledge management.
- Built hybrid GTM strategy: enterprise deals + scalable SMB product sales.

## Products

- JAICP (Just AI Conversational Platform) → A developer platform with DSL, SDK, API, debugging tools, CI/CD integration for creating chatbots and voice assistants.
- Agents Platform → A modular environment for building LLM-powered AI agents, supporting customization, integration, and enterprise deployment.
- Aimychat & Caila → Solutions for creating and managing enterprise bots and assistants, powering real-world automation in telecom, banking, and HR.

## Technology & Delivery

- Oversaw a portfolio of 10+ interconnected products.
- Managed 15+ LTS releases within a unified release cycle.
- Supported 20+ enterprise on-prem installations (banks, telecom, retail).
- Maintained 5 cloud environments, making strategic decisions on architecture, scalability, and deployment models.
- Strong technical foundation: wrote hundreds of development tasks, deep knowledge of full-stack development, system integration, and developer workflows.

## Key Skills

- 👩‍💻 Developer Platforms & Tools (SDK, API, DSL, IDE integrations)
- 🤖 AI & LLM (RAG, multi-model, OpenAI, Anthropic, LLama, Qwen)
- 📊 Product Leadership (roadmap, discovery, JTBD, GTM)
- ⚡ Developer Experience (debugging, CI/CD, integrations)
- 🏢 Enterprise AI Architecture & Scaling

## Languages

- 🇬🇧 English — Professional
- 🇷🇺 Russian — Native

## Head of Product / Product Lead

**Just AI / Tovie AI,** 2023 – 2024, Limassol, Cyprus

Led product strategy and development for enterprise AI developer platforms.

- Restructured and enhanced the product team.
- Implemented comprehensive product analytics.
- Developed centralized API management system.
- Introduced JTBD framework and feature scoring.

## Senior Product Manager

**Just AI / Tovie AI,** 2022 – 2023, Limassol, Cyprus

- Launched **Aimychat** product achieving 3x ROI in 6 months.

- Designed and implemented enterprise workspace system in JAICP (developer-focused).

- Developed advanced user administration and analytics systems.

## Product Manager (Enterprise)

**Just AI**, 2021 – 2022, St. Petersburg, RU

- Delivered **Outbound Communications Module** for JAICP.

- Established **LTS release process** for on-prem enterprise deployments.

- Enhanced enterprise implementation processes with developer tooling.

---

## Founder

**Maryand**, 2016 – 2023, St. Petersburg, RU

Built and scaled a profitable leather goods business. End-to-end ownership: production, sales, marketing, and operations.

- Built full-cycle manufacturing process from scratch, including workshop setup and quality control

- Developed efficient production management system and integrated CRM solutions

- Established and managed production team, customer service, and marketing operations

- Created brand identity, product design, and marketing strategy

- Built scalable business processes for sustainable growth

---

## Product Owner

**HUB48**, 2020 – 2021, California, US

- Architected and launched a B2B communication automation platform.

- Scaled to **$50K+ MRR** and 100+ corporate clients.

- Built UI/UX, analytics, lead scoring, and integrations.

---

### Product Contributor

Humaniq, 2018 – 2019, London, GB

- Supported product discovery by translating complex blockchain concepts into clear user flows and communication materials.

- Developed go-to-market assets (investor decks, landing pages, marketing campaigns) that helped secure funding and user adoption.

- Collaborated with product and engineering teams to align visual communication with product roadmap and feature prioritization.

- Introduced structured brand and communication guidelines that ensured consistent product messaging across markets.

---

### Full-stack Developer

**Europrofcosmetic**, 2014 – 2018, Moscow, RU

- Designed and implemented complete e-commerce solutions.

- Built CRMs, automation tools, and analytics systems.

- Gained strong technical foundation for future AI developer tools.

## Education

**ITMO University,** Sep 2005 - Jun 2007, St.Petersburg

Master of Technology, Information Technology

**ITMO University**, Sep 2001 - Jun 2005, St.Petersburg

Bachelor of Technology

## Skills

Product Leadership & Managment, Developer Platforms & Tools, AI & LLM,  RAG, MCP, Developer Experience, JS & Python + DB + Vector DB, Figma
