Andrew Grabarnick

Limassol, Cyprus | agrabarnick@gmail.com | telegram: @grabarnick | LinkedIn

I build enterprise-grade AI tools and solutions for business and developers. For over 10 years, our products have powered automation for major companies across Europe, Russia, and the CIS.

Head of AI Products

Just AI / Tovie AI, 2024 - Present, Limassol, Cyprus

Responsible for the core AI products business unit at Just AI (100+ people including product, engineering, marketing, sales, and implementation).

Managing a portfolio of AI-products and AI tools used by enterprises and mid-sized companies in banking, telecom, retail, HR, and SMB across Russia, CIS, and Europe.

Achievements:

- Scaled revenue to $10M annually with 25% YoY growth.
- Launched multiple AI-powered platform - Just AI Agent Platform.
- Worked with top-tier enterprise clients (banks, telcos, major retailers) and expanded into SMB segment.

AI Focus

Building AI-powered tools that allow engineers to create business automation solutions:

- LLM-first development approach for conversational AI and automation.
- RAG implementation for enterprise knowledge management.
- Multi-model deployments with OpenAI, Anthropic, LLama, Qwen.
- Voice and text AI assistants for customer support, HR automation, and enterprise process management.

AI Achievements:

- Designed frameworks for enterprise AI agents, deployed across multiple industries.

- Delivered enterprise-grade voice and text assistants in banking and telecom.
- Built AI-driven HR automation solution.

Leadership & Management

- Direct leadership of a 100+ people team across product, engineering, and marketing.
- Built and restructured product teams, implemented JTBD framework and story scoring.
- Close collaboration with sales and implementation teams to align roadmap with client needs.
- Hands-on experience in conflict resolution, process optimization, and scaling organizations.
- Introduced competitive analysis framework and sales forecasting system.

Business Impact

- Grew annual revenue to $10M, with consistent 25% YoY growth.
- Clients: top banks, telecom operators, major retailers, and SMBs across Russia, CIS, and Europe.
- Delivered solutions for customer service automation, HR processes, and enterprise knowledge management.
- Built hybrid GTM strategy: enterprise deals + scalable SMB product sales.

Products

- Just AI Agent Platform → A modular environment for building LLM-powered AI agents, supporting customization, integration, and enterprise deployment.
- JAICP (Just AI Conversational Platform) → A developer platform with DSL, SDK, API, debugging tools, CI/CD integration for creating chatbots and voice assistants.
- Aimychat & Caila → Solutions for creating and managing enterprise bots and assistants, powering real-world automation in telecom, banking, and HR.

Technology & Delivery

- Oversaw a portfolio of 6 interconnected products.
- Managed 15+ LTS releases within a unified release cycle.
- Supported 20+ enterprise on-prem installations (banks, telecom, retail).
- Maintained 5 cloud environments, making strategic decisions on architecture, scalability, and deployment models.
- Strong technical foundation: wrote hundreds of development tasks, deep knowledge of full-stack development, system integration, and developer workflows.

Key Skills

- Product Leadership (vision, roadmap, discovery, JTBD, GTM)
- Enterprise AI Architecture & Scaling
- AI Coding tools: Claude Code, Opencode, Codex, Cursor,
- Developer Platforms & Tools (SDK, API, DSL, IDE integrations)
- AI & LLM (RAG, multi-model, OpenAI, Anthropic, LLama, Qwen)
- Developer Experience (debugging, CI/CD, integrations)

Languages

- English — Professional
- Russian — Native

Founder & Lead Engineer

Stractik AI, 2026 - Present, Limassol, Cyprus

Agentic AI autonomous management system for business, projects, and products. Transform information into structure, plans into action, and complexity into sustainable growth.

- **Product Vision & Execution:** Engineered a 0-to-1 solution to automate complex, non-linear business workflows that traditional LLM applications
  fail to handle due to context limitations.

- **Agentic Business Automation:** Orchestrated a fleet of autonomous agents
  (Mastra, Composio) capable of executing tasks across 100+ enterprise tools (GitHub, Slack, Calendar), bridging the gap between AI analysis and
  real-world action.
- Graph-Enhanced Intelligence: Implemented a Neo4j knowledge graph to manage complex relationships between goals and tasks, enabling the AI to
  maintain deep situational awareness and provide high-confidence recommendations.
- Scalable Architecture: Built a production-ready stack (TypeScript, Node.js,
  React, Docker) with a focus on modularity and rapid deployment, ensuring
  the system can scale from personal productivity to team-wide automation.

Head of Product / Product Lead

Just AI / Tovie AI, 2023 – 2024, Limassol, Cyprus

Led product strategy and development for enterprise AI developer platforms.

- Restructured and enhanced the product team.
- Implemented comprehensive product analytics.
- Developed centralized API management system.
- Introduced JTBD framework and feature scoring.

Senior Product Manager

Just AI / Tovie AI, 2022 – 2023, Limassol, Cyprus

- Designed and implemented enterprise workspace system in JAICP (developer-focused).

- Launched Aimychat product achieving 3x ROI in 6 months.

- Developed advanced user administration and analytics systems.

Product Manager (Enterprise)

Just AI, 2021 – 2022, St. Petersburg, RU

- Delivered **Outbound Communications Module** for JAICP.

- Established **LTS release process** for on-prem enterprise deployments.

- Enhanced enterprise implementation processes with developer tooling.

Founder

Maryand, 2016 – 2023, St. Petersburg, RU

Built and scaled a profitable leather goods business. End-to-end ownership: production, sales, marketing, and operations.

- Built full-cycle manufacturing process from scratch, including workshop setup and quality control

- Developed efficient production management system and integrated CRM solutions

- Established and managed production team, customer service, and marketing operations

- Created brand identity, product design, and marketing strategy

- Built scalable business processes for sustainable growth

Product Owner

HUB48, 2020 – 2021, California, US

- Architected and launched a B2B communication automation platform.

- Scaled to **$50K+ MRR** and 100+ corporate clients.

- Built UI/UX, analytics, lead scoring, and integrations.

Product Contributor

Humaniq, 2018 – 2019, London, GB

- Supported product discovery by translating complex blockchain concepts into clear user flows and communication materials.

- Developed go-to-market assets (investor decks, landing pages, marketing campaigns) that helped secure funding and user adoption.

- Collaborated with product and engineering teams to align visual communication with product roadmap and feature prioritization.

- Introduced structured brand and communication guidelines that ensured consistent product messaging across markets.

Full-stack Developer

Europrofcosmetic, 2014 – 2018, Moscow, RU

- Designed and implemented complete e-commerce solutions.
- Built CRMs, automation tools, and analytics systems.
- Gained strong technical foundation for future AI developer tools.
- Stack: NodeJS, MySQL, PHP, JQuerry, JavaScript, Docker

Education

ITMO University, Sep 2005 - Jun 2007, St.Petersburg

Master of Technology, Information Technology

ITMO University, Sep 2001 - Jun 2005, St.Petersburg

Bachelor of Technology

Skills

Product Leadership & Managment, Product strategy, product lifecycle, metrics/KPIs, OKRs, stakeholder management, cross-functional team, Vibe-coding, Developer Platforms & Tools, AI & LLM, RAG, MCP, Developer Experience, JS & Python + DB + Vector DB, Docker, Figma
